

Hydraulic Hoses

Hydraulic Market

As Original Equipment Manufacturers (OEMs) market their products across national boundaries, you need to be able to order hydraulic products that consistently meet the most rigorous international quality requirements, standards and industry specifications.

Bilflex manufacturing footprint that operates under standardized and high-quality product and output specifications. manufacturing processes allow any of our customers — regardless of where they are — to buy our hydraulic products that look consistent and perform to the same exacting standards. Hydraulic hose, couplings and equipment are becoming the standards for quality and reliability.

Bilflex hydraulic hose, couplings and equipment can save you time and money, no matter your time zone or currency.

Hydraulic Hose & Fitting System

As advanced hydraulic systems are designed and engineered into more and more high-powered, high-pressure equipment, the importance of high-quality, flexible, durable hose assemblies that won't fail has never been more critical. However fabricating a superior hose assembly involves more than merely crimping a coupling on a hose. The variables involved include the coupling stem and ferrule design, hose reinforcement, hose tube material, and the outside diameters of both the hose and the crimped coupling. How reliable the resulting assembly will be depends not only on how well the components are made, but on how well they are made for each other.

As the industry leader in hydraulic hose technology, has developed an integrated solution to meet the expanding needs of today's hydraulic systems — and tomorrow's. Both the hose and the coupling, designing one to complement the other. After individual components are made, hose assemblies are fabricated and performance tested to ensure that the hose and couplings perform up to and well beyond industry standards. Whether it is wire braided hose and couplings, or spiral wire hose and Global Spiral couplings, it is how delivers leak-free performance.

Bilflex hydraulic hose and fitting systems offer a combination of technology, performance and flexibility that is unmatched by anything on the market today — or for the foreseeable future! Bilflex hydraulic hose and fittings provide maximum flexibility and performance in a wide range of high-pressure hydraulic applications, while simplifying hose selection and assembly fabrication, and yet still meeting or exceeding SAE, EN, ISO or industry specific standards.

Product Range:

- **Hydraulic Hoses.**
- **Industrial Hoses**
- **Thermoplastic Hoses**
- **Thermoplastic HP Jetting Hose.**
- **Teflon (PTFE) Hoses.**
- **Composite Hoses.**
